HORSEPOWER

Gross: 323 kW 433 HP @ 1800 rpm

Net: 320 kW 429 HP @ 1800 rpm

OPERATING WEIGHT

Backhoe: 57300–60000 kg

126,320–132,280 lb

Loading shovel: 61300–62300 kg

135,140–137,350 lb

PC
600

HYDRAULIC EXCAVATOR

WALK-AROUND

Productivity Features

- **High Work Equipment Speed**

Increased arm dumping and bucket dumping speed realize efficient loading operation.

- **Lifting Mode**

The lifting mode increases the lifting force and capacity 14%.

- **Large Digging Force**

Pressing the Power Max function button temporarily increases the digging force 8%.

- **Two-mode Setting for Boom**

Switch selection allows either powerful digging or smooth boom operation.

- **Excellent Swing Performance** is achieved by twin-swing motor system even on slope.

- **Large Drawbar Pull and Steering Force** provide excellent mobility.

See page 5.

Excellent Reliability and Durability

- **Strengthened Boom and Arm**

KMAX Bucket offers superior wear-resistance for specific use in quarry. (optional)

- **Fuel Pre-filter** with water separator equipped as standard

O-ring Face Seals, which have excellent sealing performance, are used for the hydraulic hoses.

- **High-pressure In-line Filtration**

The cool-running hydraulic system is protected with the most extensive filtration system available, including a high pressure in-line filter for each main pump.

- **Highly Reliable Electronic Devices**

Exclusively designed electronic devices have passed severe testing.

- Controller
- Sensors
- Connectors
- Heat resistant wiring

See page 6, 7.

Ecology and Economy Features

- **Komatsu SAA6D140E-5 Engine Meets Tier 3 Emissions Regulations.**

- World's first cooled EGR system with bypass-assist type electronically controlled venturi
- Offers high power and low fuel consumption, while conforming to Tier 3 emission regulations.
- Reduces NOx emissions approximately 40%.
- Equipped with an electronically controlled variable speed fan.

- **Economy mode Four-level Setting**

Enables operator to select the appropriate Economy mode level to match production requirement with lowest fuel consumption.

- **Reduction of Ambient Noise**

- Meets the EU Stage 2 noise regulations.
- Electronically controlled variable speed fan drive
 - Large hybrid fan
 - Glasswool-furnished low-noise muffler and noise reducing cover around the muffler

See page 4.

Photo may include optional equipment.

Working Environment

- **Large Comfortable Cab**

- Low noise and vibration with cab damper mounting
- Large-capacity air conditioner (optional)
- Pressurized cab prevents external dust from entering
- OPG top guard level 2 (by ISO 10262 standard) capable with optional bolt-on top guard.

See page 8.

Advanced Monitor Features

- Machine condition can be checked with Equipment Management Monitoring System (EMMS). See page 11.
- Two working modes combine with lifting mode for maximum productivity. See page 5.

PRODUCTIVITY & ECOLOGY FEATURES

Komatsu Technology

Komatsu develops and produces all major components, such as engines, electronics and hydraulic components, in house.

With this "Komatsu Technology," and adding customer feedback, Komatsu is achieving great advancements in technology.

To achieve both high levels of productivity and economical performance, Komatsu has developed the main components with a total control system.

The result is a new generation of high performance and environment friendly excavators.

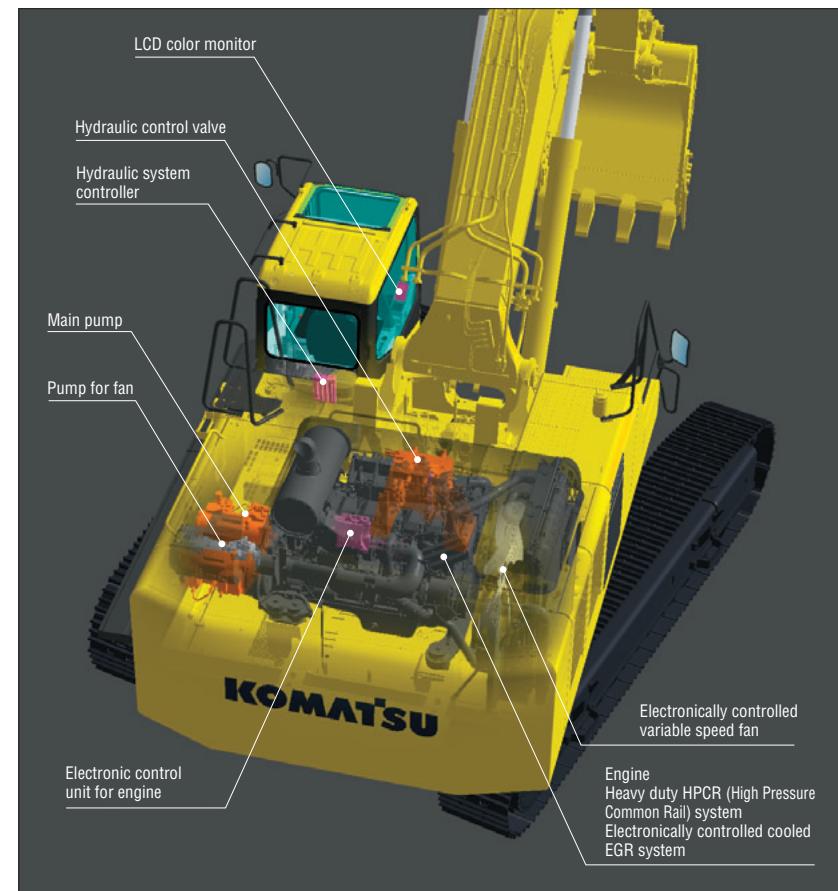

Environment-friendly Clean Engine Mounted

The PC600-8, which is equipped with the Komatsu SAA6D140E-5 engine, meets the Tier 3 emission regulations in the North America (EPA) and EU stage 3A. The SAA6D140E-5 engine adopts the world's first cooled EGR system with electronically controlled bypass-assist type venturi to reduce NOx emission 40%, while maintaining the high power and low fuel consumption.

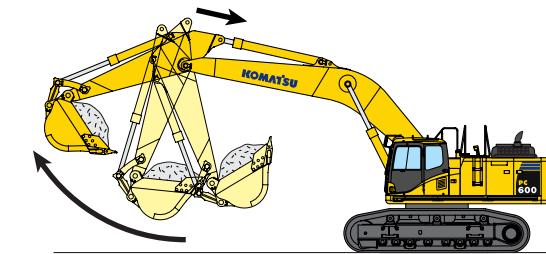

ecot3
ecology & economy - technology 3

This is an image photo: may differ from the actual engine.

Work Equipment Speed Increased

An arm quick return circuit is provided for arm dumping. This returns a portion of oil flow directly to the hydraulic tank at arm dumping to reduce the hydraulic pressure loss. Combined with increased bucket dumping speed, faster loading work is realized.

Large Digging Force

With the addition of one-touch Power Max. function digging force has been further increased. (8.5 seconds of operation)

Maximum arm crowd force (ISO):

228 kN (23.3t) → **246 kN (25.1t)** 8% UP
(with Power Max.)

Maximum bucket digging force (ISO):

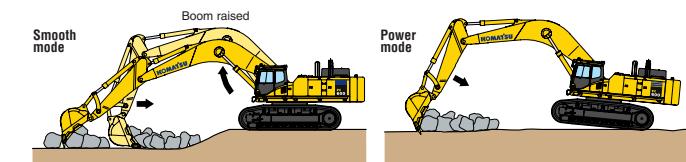

294 kN (30.0t) → **317 kN (32.3t)** 8% UP
(with Power Max.)

Lifting Mode

When lifting mode is selected, lifting capacity increases 17% by raising hydraulic pressure. The work equipment and swing speeds are lowered at the same time to provide additional control.

Two-mode Setting for Boom

Smooth mode provides easy operation for gathering blasted rock and scraping operations. When maximum digging force is needed, switch to **power mode** for more effective excavating.

Large Drawbar Pull and Steering Force

Since the machine has a large drawbar pull and a high steering force, it demonstrates excellent mobility even when it is being used on inclined sites.

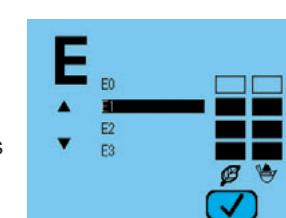

Working Mode Selection

Hydraulics

Unique two-pump system assures smooth compound movement of the work equipment. OLSS (Open Center Load Sensing System) controls all pumps for efficient engine power use. This system also reduces hydraulic loss during operation.

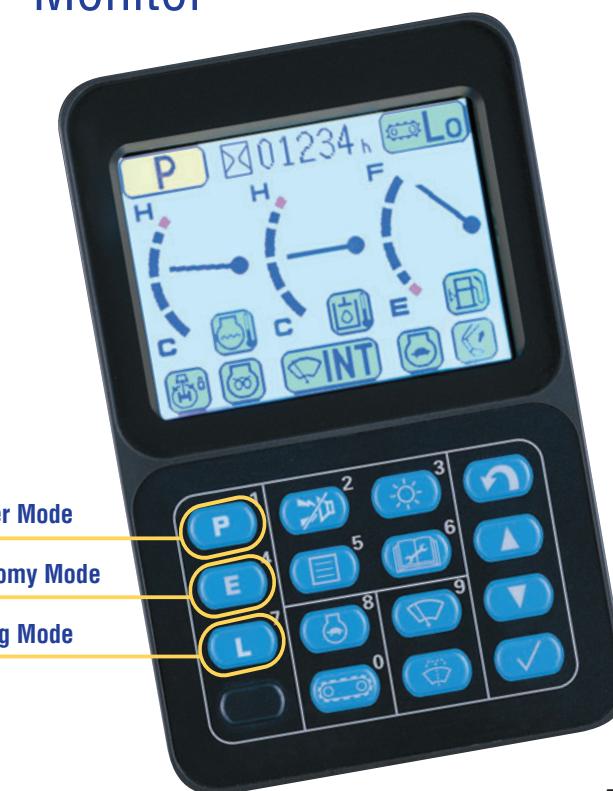

Power and Economy Mode

The PC600-8 excavator is equipped with two working modes. Each mode is designed to match engine speed, pump speed, and system pressure to the current application, giving the operator flexibility to match equipment performance to the job at hand.

Working Mode	Application	Advantage
P	Power Mode	<ul style="list-style-type: none"> • Maximum production/power • Fast cycle time
E (E0,E1,E2,E3)	Economy Mode	<ul style="list-style-type: none"> • Good cycle time • Good fuel economy
L	Lifting Mode	<ul style="list-style-type: none"> • Hydraulic pressure is increased 17%.

Multi-Function Color Monitor

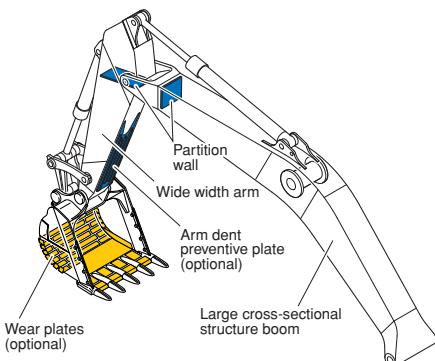

RELIABILITY FEATURES

Excellent Reliability and Durability

Strengthened Boom and Arm

Thanks to the large cross-sectional structure employing a high tensile strength steel with a thick plate, partition wall, etc., the boom and arm exhibit excellent durability and are highly resistant to bending and torsional stress.

O-ring Face Seal

The hydraulic hose seal method has been changed from a conventional taper seal to an O-ring seal. This provides improved sealing performance during operation.

Frame Structure

The revolving frame mount and center frame mount on the swing circle are no welding structure so that force is transmitted directly to the thick plate of the frame without passing through any welding.

Fuel Pre-filter (with Water Separator)

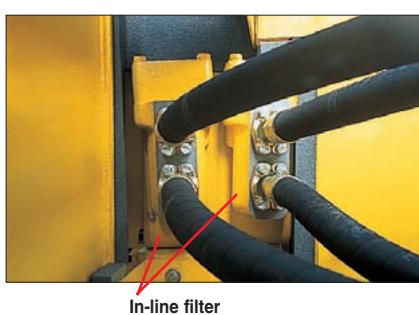

Removes water and contaminants from in the fuel to enhance the fuel system reliability.

Fuel pre-filter

High-pressure In-line Filtration

The PC600-8 has the most extensive filtration system available, providing in-line filters as standard equipment. An in-line filter in the outlet port of each main hydraulic pump reduces failures caused by contamination.

Metal Guard Rings

Metal guard rings protect all the hydraulic cylinders and improve reliability.

Heat-resistant Wiring

Heat-resistant wiring is utilized for the engine electric circuit and other major component circuit.

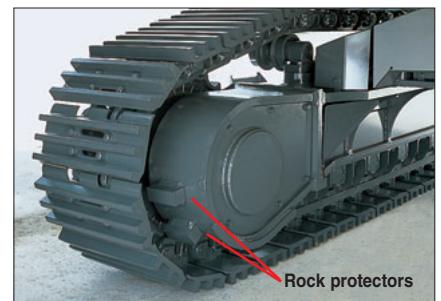

Circuit Breaker

With circuit breaker, the machine can be easily restarted after repair.

Sturdy Undercarriage

The undercarriage is strengthened to provide excellent reliability and durability when working on rocky ground or blasted rock.

Sturdy guards shield the travel motors and piping against damage from rocks. (Rock protectors are optional.)

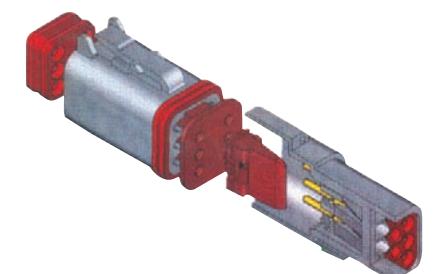

Track roller guard (full length)
(optional)

Strengthened Revolving Frame Underguard

Guards the machine body against being hit by rocks from below and prevents hydraulic components and the engine from being damaged.

DT-type connectors

DT-type connectors seal tight and have higher reliability.

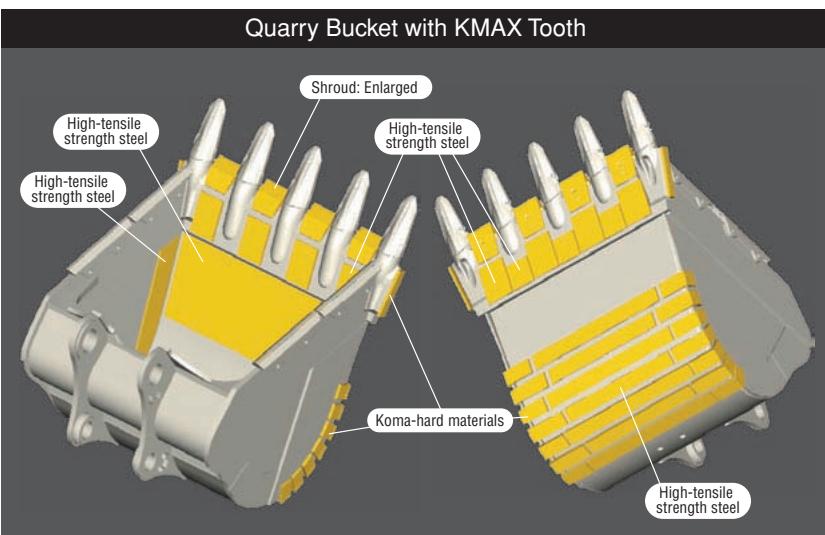

Strengthened Quarry Bucket for Provides Outstanding Wear-resistance (optional)

The bucket for specific use in quarry is impact and wear resistant, providing high performance and long life. Koma-hard materials* provide excellent wear resistance. Combined with adoption of long-life KMAX tooth, durability of bucket is drastically enhanced.

* Koma-hard materials (KVX materials):

Komatsu developed, wear-resistant, reinforced materials. Brinell hardness: 500 or more (180kgf/mm² class). Features high wear-resistance and little quality change by the heat generated during rock loading, maintaining the hardness for a long term.

KMAX Tooth for Quarry Bucket

- Unique bucket tooth shape superior digging performance
- Long-term high sharpness
- Great penetration performance
- Hammerless, safe, and easy tooth replacement
(Tooth replacement time: Halves the conventional machine.)

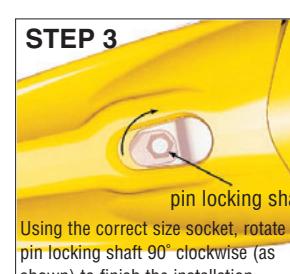

Photo may include optional equipment.

WORKING ENVIRONMENT

The cab interior is spacious and provides a comfortable working environment...

Large Comfortable Cab

Comfortable Cab

New PC600-8's cab offers an exceptionally comfortable operating environment. The large cab enables full flat reclining of the seat back with headrest.

Pressurized Cab

The optional air conditioner, air filter and a higher internal air pressure (**6.0 mm Aq** 0.2" in Aq) prevent external dust from entering the cab.

Low Noise Design

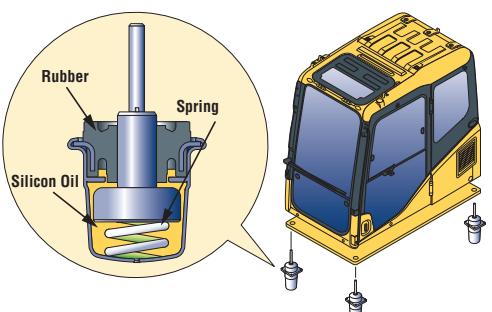

Noise level is remarkably reduced, not only engine noise but also swing and hydraulic relief noise.

Low Vibration with Cab Damper Mounting

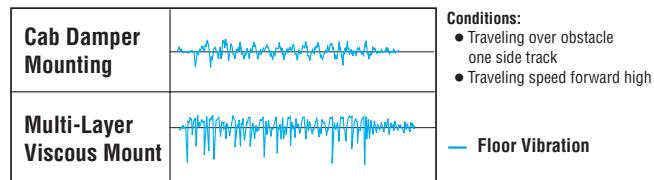

PC600-8 uses a new, improved cab damper mount system that incorporates longer stroke and the addition of a spring. The new cab damper mounting combined with a strengthened left and right side deck aids vibration reduction at the operator's seat.

Vibration at floor is reduced from 120 dB (VL) to 115 dB (VL).

dB (VL) is index for expressing size of vibration.

Comparison of Riding Comfort

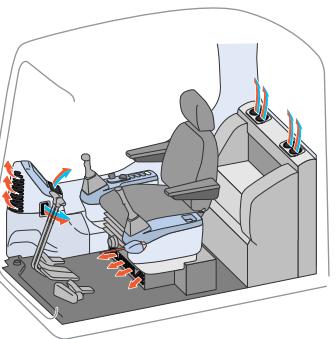

Vertical direction on graph shows size of vibration.

Photo may include optional equipment.

Automatic Air Conditioner (Optional)

A 6,900 kcal air conditioner is utilized. The bi-level control function keeps the operator's head and feet cool and warm respectively. This improved air flow function keeps the inside of the cab comfortable throughout the year.

Skylight

Sliding Window

Washable Cab Floormat
The PC600-8's cab floormat is easy to keep clean. The gently inclined surface has a flanged floormat and drainage holes to facilitate runoff.

Seat with headrest
reclined full flat

Photo may include optional equipment.

Multi-position Controls

The multi-position, PPC (proportional pressure control) levers allow the operator to work in comfort while maintaining precise control. A double-slide mechanism allows the seat and control levers to move together or independently, allowing the operator to position the controls for maximum productivity and comfort.

Seat Sliding Amount: 340 mm 13.4", increased 120 mm 4.7"

Defroster (optional)

Cab Frame Mounted Wiper

Bottle Holder and Magazine Rack

Safety Features

Cab

OPG top guard level 2 (by ISO 10262) capable with optional bolt-on top guard.

Wide Visibility

The right side window pillar has been removed and the rear pillar reshaped to provide better visibility. Blind spots have been decreased by 34%.

Pump/engine room partition prevents oil from spraying on the engine if a hydraulic hose should burst.

Thermal and fan guards are placed around high-temperature parts of the engine and fan drive.

Steps serrated and large handrail

Steps serrated provide anti-slip footing for added safety.

Large Handrail and Wide Catwalk

Anti-Slip Plates

Thermal Guard

EASY MAINTENANCE FEATURES

Komatsu Designed the PC600-8 for Easy Service Access.

Easy Checking and Maintenance of Engine

Engine check points are concentrated on one side of the machine to facilitate daily checks. Thermal guards are placed around high-temperature parts such as turbocharger.

One-touch Drain Cock

Easier, cleaner engine oil changes.

Reduced Maintenance Costs

High performance filters are used in the hydraulic circuit and engine. Longer hydraulic oil, hydraulic oil filter, engine oil and engine oil filter element replacement intervals significantly reduce maintenance costs.

Electric operated Grease Gun Equipped with Hose Reel (Optional)

Greasing is made easy with the electric operated grease gun and indicator.

Indicator Grease gun

Wide Catwalk and Large Handrails

Easier, safer operator cab access and maintenance checks.

Anti-slip Plates

Spiked plates provided on top of the machine cab maintains anti-slip performance for a prolonged period.

Steps Connected to the Machine Cab

Steps allows access from left hand catwalk to top of machine for engine check and maintenance.

Dust Indicator with 5-step Indication

Informs of air cleaner clogging in 5 steps to warn of filter condition.

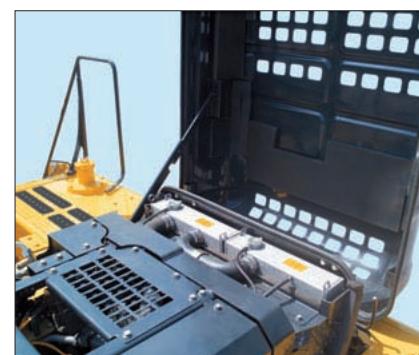

Easy Cleaning of Radiator

Reverse-rotation function of the hydraulic driven fan facilitates cleaning of the cooling unit.

Easy Detachable Radiator

Engine hood opens fully to facilitate removal and installation of the radiator. The hood can be opened vertically by changing the position of the torsion bar.

High-Quality EMMS Self-diagnostic System

• Abnormality Checking Function

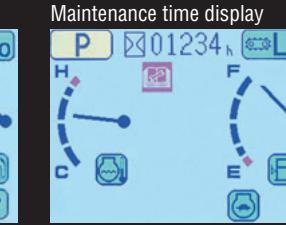

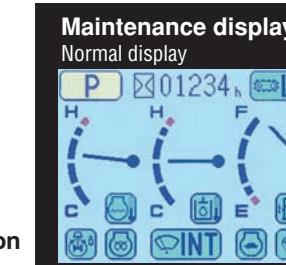

In case any abnormality should occur, the monitoring system checks whether hydraulic pressure, solenoid ON/OFF status, disconnection, engine speed, current of electricity, etc. are in the normal conditions to keep the machine downtime to a minimum.

• Maintenance History Memory Function

Maintenance records such as replacement of engine oil, hydraulic oil, filters, etc. can be stored.

• Trouble Data Memory Function

All the trouble data are stored to serve as references for future checking and maintenance.

EMMS

Equipment Management Monitoring System

SPECIFICATIONS

**ENGINE**

Model	Komatsu SAA6D140E-5
Type	Water-cooled, 4-cycle, direct injection
Aspiration	Turbocharged, aftercooled, cooled EGR
Number of cylinders	6
Bore	140 mm 5.51"
Stroke	165 mm 6.50"
Piston displacement	15.24 ltr 930 in³
Governor	All-speed, electronic
Horserpower:	
SAE J1995	Gross 323 kW 433 HP
ISO 9249 / SAE J1349*	Net 320 kW 429 HP
Rated rpm	1800 rpm
Fan drive type	Hydraulic
Meets EPA Tier 3 and EU stage 3A emission regulations.	

*Net horsepower at the maximum speed of radiator cooling fan is 288 kW 386HP.

**HYDRAULIC SYSTEM**

Type	Open-center load-sensing system
Number of selectable working modes	3

Main pump:	
Type	Variable-capacity piston pumps
Pumps for	Boom, arm, bucket, swing, and travel circuits
Maximum flow:	
Main	2 x 410 ltr/min 2 x 108 U.S. gal/min
Fan drive pump	Variable-capacity piston pump
Hydraulic motors:	
Travel	2 x axial piston motor with parking brake
Swing	2 x axial piston motor with swing holding brake
Relief valve setting:	
Implement circuits	
Backhoe	31.9 MPa 325 kgf/cm² 4,620 psi
Loading shovel	29.4 MPa 300 kgf/cm² 4,270 psi
Travel circuit	34.3 MPa 350 kgf/cm² 4,980 psi
Swing circuit	25.5 MPa 260 kgf/cm² 3,700 psi
Pilot circuit	2.9 MPa 30 kgf/cm² 430 psi
Hydraulic cylinders:	
Number of cylinders—bore x stroke	
Boom	2 – 185 mm x 1725 mm 7.3" x 67.9"
Arm	
Backhoe	1 – 200 mm x 2045 mm 7.9" x 80.5"

STANDARD EQUIPMENT
ENGINE AND RELATED ITEMS:

- Air cleaner, double element, dry
- Engine, Komatsu SAA6D140E-5
- Variable speed cooling fan, with fan guard

ELECTRICAL SYSTEM:

- Alternator, 50 amp, 24 V
- Batteries, 170 Ah, 2 x 12 V
- Starting motors, 11kW
- Working lights 2 (boom and RH)
- Auto decelerator

UNDERCARRIAGE:

- **600 mm** 24" triple grouser
- 8 track/3 carrier rollers (each side)
- 9 track/3 carrier rollers (each side)(LC)
- Hydraulic track adjusters (each side)
- Variable track gauge
- Sealed track

GUARDS AND COVERS:

- Dust-proof net for radiator and oil cooler
- Pump/engine room partition cover
- Travel motor guards
- Strengthened revolving frame underguard

OPERATOR ENVIRONMENT:

- Damper mount, all-weather, sound-suppressed cab with tinted safety glass windows, lockable door, intermittent window wiper and washer, floormat, cigarette lighter and ashtray
- Multi-function color monitor, fuel control dials, service meter, gauges (coolant temperature, hydraulic oil temperature and fuel level), caution lights (electric charge, engine oil pressure, and air cleaner clogging), indicator lights (engine preheating and swing lock light) level check lights (coolant and engine oil level), self-diagnostic system with trouble data memory
- Seat, fully adjustable with suspension
- Cab with pull-up type front window
- Rear view mirror (RH)

HYDRAULIC CONTROLS:

- Fully hydraulic, with Open-Center Load-Sensing (OLSS) and engine speed sensing (pump and engine mutual control system)
- One gear pump for control circuit
- Two axial piston motors for swing with single-stage relief valve
- One axial piston motor per track for travel with counter balance valve
- Two variable capacity piston pumps
- Control valves, 5+4 spools (boom, arm, bucket, swing, and travel)
- Control levers, wrist control levers for arm, boom, bucket, and swing with PPC system
- Control levers and pedals for steering and travel with PPC system
- Oil cooler
- In-line filter
- L mode system
- Two-mode setting for boom
- Power max function

DRIVE AND BRAKE SYSTEM:

- Brakes, hydraulic lock travel brakes, oil disc parking
- Hydrostatic two travel speed system with planetary triple reduction final drive

OTHER STANDARD EQUIPMENT:

- Automatic swing holding brake
- Corrosion resister
- Counterweight, **10750 kg** 23,700 lb
- Horn, electric
- Marks and plates, English
- Paint, Komatsu standard
- Large handrails
- One-touch engine oil drainage
- PM tune-up service connector
- Travel alarm
- Rear reflector
- Anti-slip plates

OPTIONAL EQUIPMENT

- Alternator, 75 Amp, 24 V
- Arms (Backhoe):
PC600-8:
—**3500 mm** 11'6" arm assembly
—**3500 mm** 11'6" HD arm assembly
—**4300 mm** 14'1" arm assembly
—**5200 mm** 17'1" arm assembly
—**2900 mm** 9'6" SE arm assembly
- Auto air conditioner
- Automatic greasing
- Booms (Backhoe):
—**7660 mm** 25'2" boom assembly
—**7300 mm** 23'11" HD boom assembly
—**6600 mm** 21'8" SE boom assembly
- Cab front guard (ISO 10262 level 2)

- Cab with fixed front window
- Catwalk
- Counterweight **13500kg** 29,800 lb
- 12V electric supply
- Fire extinguisher
- Full length track guard
- General tool kit
- Grease gun, electric operated, with indicator
- Interconnected horn and warning light
- Large-capacity batteries
- Loading shovel attachments
- Lower wiper
- OPG top guard
- Radio AM/FM
- Rain visor
- Rear view mirror (LH)
- Seat belt **78 mm** 3", **50 mm** 2"
- Shoes:
—**600 mm** 24" double grouser for backhoe
—**750 mm** 29.5" triple grouser for backhoe
—**900 mm** 35.5" triple grouser for PC600LC backhoe only
- Spare parts for first service
- Step light with timer
- Sun visor
- Track frame undercover (center)
- Vandalism protection locks
- Working lights 2 (on cab)
